ACCESS SERVICE

13 - Additional Engineering, Additional Labor and Miscellaneous Services

In this section normally scheduled working hours are an employee's scheduled work period in any given calendar day (e.g., 7:00 a.m. to 4:00 p.m.) for the application of rates based on working hours.

13.1 Additional Engineering

Additional engineering will be provided by the Telephone Company at the rates set forth in 13.1.1 when:

- (A) A customer requests additional technical information after the Telephone Company has already provided the technical information normally included on the Design Layout Report (DLR) as set forth in 6.1.5 and 7.1.6 preceding.

The Telephone Company will notify the customer that additional engineering charges, as set forth in 13.1.1 following, will apply before any additional engineering is undertaken. These charges apply per Telephone Company employee performing billable work at the customer's request. The sum of the time is used to determine the number of 30-minute increments to be billed. Only one initial increment is to be billed per request.

- (B) A customer requests BellSouth Expanded Interconnection service under the terms specified in Section 20 of this Tariff. (T)
(T)

These charges apply per Telephone Company employee performing billable engineering work associated with the provision and maintenance of the requested BellSouth Virtual Expanded Interconnection arrangement. The sum of the time is used to determine the number of 30-minute increments to be billed. Only one initial increment is to be billed per work project.

ACCESS SERVICE

13 - Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.2 Additional Labor (Optional Priority Installation and Repair Service)

Additional labor is that labor requested by the customer on a given service and agreed to by the Telephone Company or when the customer requests BellSouth Expanded Interconnection service and the Telephone Company must perform installation and/or acceptance testing activities as set forth in 13.2.1 through 13.2.5 following. The Telephone Company will notify the customer that additional labor charges as set forth in 13.2.6 following will apply before any additional labor is undertaken. The labor charges apply per Telephone Company employee performing billable work at the customer's request. The sum of the time is used to determine the number of 30-minute increments to be billed. Only one initial increment is to be billed per request. A request for additional labor by a Telephone Company employee at a time not consecutive with the employee's scheduled work period is subject to a minimum charge of three hours. (T)

13.2.1 Overtime Installation

Overtime installation is that Telephone Company installation effort outside of normally scheduled working hours.

13.2.2 Overtime Repair

Overtime repair is that Telephone Company maintenance effort performed outside of normally scheduled working hours.

13.2.3 Stand By

Stand by includes all time in excess of one-half (1/2) hour during which Telephone Company personnel stand by to make cooperative tests with a customer to verify facility repair on a given service.

13.2.4 Testing and Maintenance with Other Telephone Companies

Additional testing, maintenance or repair of facilities which connect to facilities of other telephone companies, which is in addition to normal effort required to test, maintain or repair facilities provided solely by the Telephone Company.

ACCESS SERVICE

13 - Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services

13.3.1 Maintenance of Service

- (A) When a customer reports a trouble to the Telephone Company for clearance and no trouble is found in the Telephone Company's facilities, the customer shall be responsible for payment of a Maintenance of Service charge.

Failure of Telephone Company personnel to find trouble in Telephone Company facilities will result in no charge if the trouble is actually in those facilities, but not discovered at the time.

- (B) The customer shall be responsible for payment of Maintenance of Service charge for all maintenance/repair work performed by the Telephone Company in connection with its BellSouth Expanded Interconnection offering. (T)
- (C) The customer shall be responsible for payment of a Maintenance of Service charge when the Telephone Company dispatches personnel and the trouble is in equipment or communications systems provided by other than the Telephone Company or in detariffed CPE provided by the Telephone Company.
- (D) The Maintenance of Service charge applies for the period of time from when Telephone Company personnel are dispatched to when the work is completed. When more than one employee is dispatched the sum of the time is used to determine the number of 30-minute increments to be billed. Only one initial increment is to be billed per request. A request resulting in the dispatch of a Telephone Company employee at a time not consecutive with the employee's scheduled work period is subject to a minimum charge of three hours.

In either (A) or (B) preceding, no credit allowance will be applicable for the interruption involved if the Maintenance of Service charge applies.

13.3.3 BellSouth Equal Access Subscription

(S)

(A) Description

(1) Subscription

Subscription is a procedure whereby an end user for Telephone Exchange Service lines and/or trunks or a location provider or its authorized agent for pay telephones may select and designate to the Telephone Company an IC to access for interLATA, interstate calls without dialing an access code. This IC is referred to as the end user's or location provider's or authorized agent's preferred IC and is defined by a unique Carrier Identification Code (CIC) shown on the customer service record.

(C)(x)

(C)(x)

Should a customer wish to use other services of the same or another IC, it will be necessary for the customer to dial the necessary access code(s) to reach that IC's other service(s).

(D) (

(S) Originally filed under TN377 scheduled to become effective December 16, 1996.

(x) Issued under the authority of F.C.C. Report and Order FCC 96-388 In The Matter of Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996. CC Docket No. 96-128, released September 20, 1996, as modified in the RECONSIDERATION ORDER, FCC 96-439, released November 8, 1996.

ACCESS SERVICE

13 - Additional Engineering, Additional Labor and Miscellaneous Services
(Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.3 BellSouth Equal Access Subscription (Cont'd)

(A) Description (Cont'd)

The IC shall submit an order for all end offices subtending an access tandem indicating whether 1+ traffic from its subscribed pay telephones shall be routed to itself (as direct IC) or to another IC (as transport carrier). Recordings with alternate dialing instructions are not acceptable. If calls are to be routed to a transport carrier, the 0+ IC must provide written authorization certifying that the order is being submitted pursuant to an agreement with the transport carrier. Only one transport carrier may be indicated for each access tandem.

If the IC designated as the primary IC for 0+ and 00- traffic does not submit an order designating the transport carrier for 1+ traffic for pay telephones at all end offices subtending an access tandem, the 1+ traffic for that office will continue to be routed to the existing 1+ carrier until the subscribed 0+ carrier is ready to handle the 1+ sent-paid traffic, or makes arrangements with another IC to handle the traffic.

(B) Verification of Choice of IC

ICs must request verification of choice from their customers/subscribers. All letters of agency, recordings, or other evidence of verification shall be maintained by the IC for a minimum period of two years after obtaining such verification.

(B) Verification of Choice of IC (Cont'd)

(C)

(1) Verification of Orders

No IC (submitting carrier) shall submit to the Telephone Company a primary or preferred interexchange carrier (PIC) change order unless and until the order has first been confirmed in accordance with one of the following procedures:

(C)
(C)
(C)
(C)

(a) The IC has obtained the customer's written or electronically signed authorization and/or verification to submit the order that explains what occurs when a PIC is changed and confirms:

(C)
(C)
(C)

- the customer's billing name and address and each telephone number to be covered by the PIC change order;
- the decision to change the PIC to the IC; and
- the customer's understanding of the PIC change fee; or

(b) The IC has obtained the customer's electronic authorization, placed from the telephone number(s) on which the PIC is to be changed, to submit the order that confirms the information described in 13.3.3.B(1)(a) preceding to confirm the authorization; or

(c) An appropriately qualified independent third party has obtained the customer's oral authorization to submit the PIC change order that confirms and includes appropriate verification data (e.g., the customer's date of birth or social security number).

(C)
(C)
(C)
(C)
(D)

An appropriately qualified independent third party must operate in a location physically separate from the IC and may not be owned, managed, controlled, or directed by the soliciting IC, nor can it receive financial incentives to confirm carrier changes.

(C)
(C)
(C)
(C)

(2) The IC must submit a PIC change order, no more than 60 days after obtaining the written or electronically signed authorization.

(Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.3 BellSouth SWA Equal Access Subscription (Cont'd)

(C) Discrepancy in Subscription

(1) Definitions:

- Authorized carrier is defined as any carrier that submits a change on behalf of an end user or location provider or its authorized agent, in the selection of a primary or preferred interexchange carrier (PIC) with authorization verified.
- Unauthorized carrier is defined as any carrier that submits a change on behalf of an end user or location provider or its authorized agent, in the selection of a primary or preferred interexchange carrier (PIC) but fails to verify authorization.
- Unauthorized change is a change in an end user or location provider or authorized agent's selection of a primary or preferred interexchange carrier (PIC) that was made without verification.

- (2) When the Telephone Company is informed by an end user or location provider or its authorized agent of an alleged unauthorized change, the Telephone Company shall notify both the authorized and alleged unauthorized carrier of the incident. The Telephone Company shall direct the end user or location provider or its authorized agent to the relevant governmental agency, when an alleged unauthorized change is reported, for determination of fault.

In accordance with FCC Slamming Liability Rules, FCC Docket 94-129, the relevant governmental agency will determine whether an unauthorized change occurred and resolution shall be handled directly with the authorized carrier, the unauthorized carrier and the end user or location provider or its authorized agent.

- (3) When two or more IC orders are received for an end user or location provider line, the order with the latest application date determines customer choice.

(x) Issued under the authority of F.C.C. Third Report and Order and Second Order on Reconsideration, Implementation of the Subscriber Carrier Selection Changes Provisions of the Telecommunications Act of 1996; Policies and Rules Concerning Unauthorized Changes of Consumers' Long Distance Carriers, CC Docket. 94-129, released August 15, 2000.

(C) Discrepancy in Subscription (Cont'd)

(3) (Cont'd)

ICs involved in changes will be notified by the weekly activity report via paper format or mechanized interface in Network Operations Forum (NOF) format.

- (4) The IC will be assessed the subscription change charge as specified in 13.3.3(E) following, when an alleged unauthorized change has been reported by the end user or location provider or its authorized agent.

(D) BellSouth Equal Access Subscription Charge Application

- (1) New end users or new location providers or their authorized agent will be asked to select a preferred IC at the time they place an order with the Telephone Company for Telephone Exchange Service, or pay telephone service. There will be no charge for this initial selection. The nonrecurring charge for any subsequent change is as set forth in 13.3.3(E) following.

13.3 Miscellaneous Services (Cont'd)
13.3.3 BellSouth Equal Access Subscription (Cont'd)

(D) BellSouth Equal Access Subscription Charge Application (Cont'd)

(1) (Cont'd)

This charge is billed to the end user which is the subscriber to the Telephone Exchange Service or to the location provider or its authorized agent of pay telephones, except as set forth in the Commission's Allocation Plan when such charge(s) will be billed to an IC. At the option of the IC, this charge may be billed to the IC instead of the end user.

- (2) On-Line Transfer service is available to ICs for the purpose of assisting ICs and customers in the establishment of the end user's or location provider's or its authorized agent's account. This service is not applicable when the end user initiates a request via the internet. Once the end user or location provider or its authorized agent selects a preferred IC, the Telephone Company representative will provide the end user or location provider or its authorized agent with the preferred IC's 800 telephone number. If the preferred IC participates in On-Line Transfer Service, the end user or location provider or its authorized agent will have the option of being transferred directly to the preferred IC.

On-Line Transfer service will not be available to end users or location providers or their authorized agents when the end users or location providers or their authorized agents have selected a preferred IC for intraLATA subscription, and a preferred IC for interLATA subscription and the preferred ICs are not the same IC, and both ICs participate in the On-Line Transfer service.

Furthermore, when the Telephone Company uses third party verification to confirm its selection as local or intraLATA toll service provider, On-Line Transfer service will not be available.

(D) BellSouth Equal Access Subscription Charge Application (Cont'd)

(2) (Cont'd)

(a) On-Line Transfer service is available in all states within the Telephone Company's operating territory. On-Line Transfer service may be ordered through a service agreement submitted to the Telephone Company. The service must be ordered on a state basis.

(b) The Telephone Company representative will make one attempt to transfer the end user or location provider or its authorized agent to the preferred IC. When the transfer is completed and the Telephone Company's representative receives one audible ring, the representative will disconnect from the call. If a busy line of circuit busy is encountered, the end user or location provider or its authorized agent will be instructed to dial the 800 telephone number, previously provided, at a later time.

The preferred IC will be billed applicable charges for the transfer as provided in 13.3.3(E), following.

(c) The preferred IC must comply with the following guidelines:

- i. The preferred IC must provide a dedicated 800 number for the end user or location provider or its authorized agent transfer.
- ii. On-Line Transfer service calls must be processed on a first priority basis, i.e. 95% of all calls transferred must be answered by the preferred IC within 30 seconds.
- iii. The preferred IC must process transferred calls within six minutes.

(d) The preferred IC must provide written notification thirty days prior to discontinuance of this service.

(3) If an IC elects to discontinue BellSouth SWA FGD or BellSouth SWA TSBA 3 service, the IC is obligated to contact, in writing, all end users or location providers or their authorized agents who have selected, or were allocated to, the canceling IC as their primary IC. The IC must inform the end user or location provider or its authorized agent within 90 (ninety) days that they are canceling their BellSouth SWAFGD or BellSouth SWA TSBSA 3 service; request that the end user or location provider or its authorized agent select a new IC with 30 (thirty) days; and state that the canceling IC will pay the change charge. (3) (Cont'd)

For a period of two years from the date of BellSouth SWA FGD or BellSouth SWA TSBSA 3 discontinuance, the IC discontinuing service will be responsible for paying the change charge for any of its designated end users or location providers or its authorized agents.

(4) The Telephone Company will waive the applicable subscription change charge to the end user or location provider or its authorized agent when the end user or location provider or its authorized agent has been incorrectly assigned.

(5) At the option of the IC, the nonrecurring charge for a change in subscription, as stipulated in (E) following, may be billed to the IC, instead of the end user, when the change order is submitted to the Company via the Customer Account Record Exchange (CARE) interface.

The option for the IC to be billed the PIC change charge instead of the end user is not available for orders placed via the Company's Residence/Business/Pay Telephone Service Centers.

(C)

(E) The nonrecurring charge for a change in subscription; and the charges for On-Line Transfer Service are as follows:

13.3.4 Standard Jacks - Registration Program

Standard jacks are provided by the Telephone Company to connect Registered Equipment to those services that are subject to the Registration Program as set forth in Technical Reference Publication AS No. 1. The use of jacks is covered in Part 68 of the F.C.C.'s Rules and Regulations. Specific jacks are described in the document on file with the FCC entitled "Descriptions of Standard Registration Program Connection Configurations Supplementing Configurations Described in Subpart F of Part 68 of the FCC's Rules and Regulations."

These jacks are used to terminate services provided by the Telephone Company. Other services or facilities provided by the Telephone Company or by others may also be terminated in any spare capacity of the jacks remaining after installation without additional charge for the use of such capacity.

The nonrecurring charges, which include installation, for standard jacks and their typical uses are set forth following:

	<u>ALL STATES</u>	<u>USOC</u>	<u>Nonrecurring Charges</u>

13.3.5 Testing Services

Testing Services offered under this section of the tariff are optional and subject to rates and charges as set forth in 13.3.5(C) following. Other testing services provided by the Telephone Company in association with Access Services are furnished at no additional charge. These other testing services are described in 6.1.6 and 7.1.7 preceding.

Testing services are normally provided by Telephone Company personnel at Telephone Company locations. However, provisions are made in (A)(5) and (B)(2) following for a customer to request Telephone Company personnel to perform testing services at the customer's premises.

Testing charges which are time sensitive apply per Telephone Company employee performing billable work at the customer's request. The sum of the time is used to determine the number of 30-minute increments to be billed. Only one initial increment is to be billed per request. A request for additional labor by a Telephone Company employee at a time not consecutive with the employee's scheduled work period is subject to a minimum charge of three hours.

ACCESS SERVICE

13 - Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.5 Testing Services (Cont'd)

The offering of Testing Services under this section of the tariff is made subject to the availability of the necessary qualified personnel and test equipment at the various test locations mentioned in (A), (B) and (C) following.

In addition to the testing services listed below, Performance and Fault Management Service (PFMS) will also be made available to the customer on an individual case basis. PFMS is a mechanized presentation system which allows customers to perform specific surveillance and trouble isolation functions through interfaces to specific BellSouth operational support systems.

PFMS is BellSouth's name for the BSEs listed in the ONA Services User Guide as "Real Time Access to Exchange Network Testing Facilities" and "Pass Through Diagnostics to User".

(A) BellSouth SWA Service

(T)

Testing Services for BellSouth SWA are comprised of (a) tests which are performed during the installation of a BellSouth SWA service, and (b) tests which are performed after acceptance of such access services by a customer, i.e., in-service tests. These in-service tests may be further divided into two broad categories of tests: scheduled and nonscheduled.

(T)

(T)

Scheduled tests are those tests performed by the Telephone Company on a regular basis, e.g., monthly, which result in the measurement of BellSouth SWA service. Scheduled tests may be done on an automatic basis (no Telephone Company or customer technicians involved), on a cooperative basis (Telephone Company technician(s) involved at Telephone Company office(s) and customer technician(s) involved at customer's premises), or a manual basis (Telephone Company technician(s) involved at Telephone Company office(s) and at customer's premises).

(T)

Nonscheduled tests are performed by the Telephone Company "on demand", which result in the measurement of BellSouth SWA services. Nonscheduled tests may involve Telephone Company technicians at Telephone Company offices and at the customer's premises.

13 - Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.5 Testing Services (Cont'd)

(A) BellSouth SWA Service (Cont'd)

(T)

(1) Additional Cooperative Acceptance Testing

Additional Cooperative Acceptance Testing (ACAT) of BellSouth SWA service involves the Telephone Company provision of a technician at its office(s) and the customer provides a technician at its premises, with suitable test equipment to perform the required tests. (T)

Additional Cooperative Acceptance Tests may, for example, consist of the following tests:

- . Impulse Noise
- . Phase Jitter
- . Signal to C-Notched Noise Ratio
- . Intermodulation (Nonlinear) Distortion
- . Frequency Shift (Offset)
- . Envelope Delay Distortion
- . Dial Pulse Percent Break

(2) Automatic Scheduled Testing

Automatic Scheduled Testing (AST) of BellSouth SWA services (BellSouth SWA FGC, BellSouth SWA FGD, BellSouth SWA TSBSA 2 and BellSouth SWA TSBSA 3), where the customer provides remote office test lines and 105 test lines with associated responders or their functional equivalent, will consist of monthly loss and C-message or C-notched noise tests. However, the customer may specify a greater number of tests. In addition to the loss and noise tests, the IC may also order, at additional charges, gain-slope and balance testing. (T)
(T)
(T)

The Telephone Company will provide a monthly AST report that lists the test results for each trunk tested. Trunk test failures requiring customer participation for trouble resolution will be provided to the customer on an as-occurs basis.

(5) Nonscheduled Testing

Nonscheduled Testing (NST) of BellSouth SWA services is where:

(T)

- the customer provides remote office test lines and 105 test lines with associated responders or their functional equivalent ("automatic testing"), or
- the Telephone Company provides a technician at its office(s) and the customer provides a technician at its premises, with suitable test equipment to perform the required tests ("cooperative testing"), or
- the Telephone Company provides a technician at its office(s), and/or at the customer's premises with suitable test equipment to perform the required tests ("manual testing").

Nonscheduled Tests may consist of any test(s) required by the IC, for example loss, noise, slope, envelope delay* or balance.

(6) Obligations of the Customer

- (a) The customer shall provide the Remote Office Test Line priming data to the Telephone Company, as appropriate, to support AST as set forth in 13.3.5(A)(2) preceding or NST as set forth in 13.3.5(A)(5) preceding.
- (b) The customer shall make the facilities to be tested available to the Telephone Company at times mutually agreed upon.
- (c) Access to the test lines for BellSouth SWA FGD and BellSouth SWA TSBSA 3 service should follow protocols recommended in Technical Reference TR-NPL-00258.

(T)
(T)

* Envelope delay tests are not available with Automatic Testing.

(B) Special Access (a.k.a. BellSouth SPA) Service

(T)

The Telephone Company will, at the request of a customer, provide assistance in performing specific tests requested by the customer.

(1) Additional Cooperative Acceptance Testing (ACAT)

When a customer provides a technician at its premises or at an end user's premises, with suitable test equipment to perform the requested tests, the Telephone Company will provide a technician at its office for the purpose of conducting Additional Cooperative Acceptance Testing on Voice Grade services (a.k.a. BellSouth SPA DSO VG). At the customer's request, the Telephone Company will provide a technician at the customer's premises or at the end user premises. These tests may, for example, consist of the following: (T)

- Attenuation Distortion (i.e., frequency response)
- Intermodulation Distortion (i.e., harmonic distortion)
- Phase Jitter
- Impulse Noise
- Envelope Delay Distortion
- Echo Control
- Frequency Shift

(2) Nonscheduled Testing (NST)

When a customer provides a technician at its premises, with suitable test equipment to perform the required tests, the Telephone Company will provide a technician at its office for the purpose of conducting Nonscheduled Testing. At the customer's request, the Telephone Company will provide a technician at the customer's premises. Nonscheduled tests may consist of such tests as loss, noise, slope and envelope delay.

A customer may also request nonscheduled testing for the purpose of isolating trouble. If no trouble is found in the Telephone Company's facilities, the customer shall be responsible for paying nonscheduled testing charges as set forth in 13.3.5(C)(2)(b) following.

13.3.6 Provision of Access Service Billing Options

13.3.6.1 General Regulations

- (A) Access Bills, which include Customer Service Records, are available in two formats: (1) Standard Paper Bill and (2) Billing Data Tape (BDT). At the customer's request and at no charge, the customer may choose one primary billing medium in either one of the above two billing formats. A description of these two billing formats and their available options are described in 13.3.6.2, following.

- (B) The Telephone Company will accept a request for change from one form of primary billing medium to another at no charge to the customer. Where a customer requests combinations of more than one type of billing media, and the Telephone Company can, with reasonable effort, comply with that request, such combinations will be provided to the customer.

13.3.6 Provision of Access Service Billing Options (Cont'd)

13.3.6.2 Description of Billing Options

The customer may select as the primary billing medium one option from either the Standard Paper Bill format described in (A) below or the Billing Data Tape (BDT) format described in (B) below:

- (A) The Standard Paper Bill format is available in the two options shown below. The customer may select one of these options as the primary billing medium at no charge. Should the customer request additional copies of the Access Bill in one of these options, the customer will be charged rates shown in 13.3.6.3(A), following.

(1) Standard Paper Bill

This option provides the customer a Standard Paper Bill in hard copy.

(2) CD-ROM

This option provides the customer a CD-ROM, which allows the customer to view or print the Standard Paper Bill.

- (B) The Billing Data Tape (BDT) format is available in the four options shown below. The customer may select one of these options as the primary billing medium at no charge and will also receive an abbreviated paper bill for bill payment purposes at no charge. Should the customer request additional copies of the Access Bill in one of these options, the customer will be charged rates shown in 13.3.6.3(A), following.

(1) CONNECT: Direct

This option provides an electronic transmission of the customer's Access Bill in BDT format and requires the customer to have a dedicated circuit from the customer's premises to a BellSouth data center.

(2) CD-ROM

This option provides the delivery of the customer's Access Bill in BDT format via a physical medium, i.e., CD-ROM.

(3) Cartridge Tape

This option provides the delivery of the customer's Access Bill in BDT format via a physical medium, i.e., Cartridge Tape. When the customer elects to receive additional copies of its Access Bill on Cartridge Tape, only one copy of the Cartridge Tape will be provided. The Telephone Company does not require the customer to return previously supplied tapes.

(4) Internet Mailbox

This option provides the delivery of the customer's Access Bill in BDT format to an Internet-based, secure mailbox from which customers may download their bill.

13.3.6 Provision of Access Service Billing Options (Cont'd)

13.3.6.2 Description of Billing Options (Cont'd)

(C) Unless otherwise specified by the customer, Standard Paper Bills, Cartridge Tape and/or CD ROM will be sent via U.S. Mail service. However, at the customer's request, the customer or the customer's representative may pick up the Paper Bills, CD ROM or Cartridge Tape at a location designated by the Telephone Company.

(D) The customer may deem it necessary to request that the Telephone Company resend the Access Service billing information. Such a request, when not the result of Telephone Company error, will be subject to the same rates as an original request for copies of Access Service billing information. These rates are set forth in 13.3.6.3, following.

13.3.6.3 Rates and Charges

(A) The rates and charges for additional copies of the customer's Access Service Bill are as follows:

(1) Standard Paper Bill Options

	<u>Rate</u>
(a) Standard Paper Bill - per paper page	\$.25
(b) CD ROM - per CD ROM	\$ 60.00

(2) Billing Data Tape (BDT)

(a) Connect: Direct - per record transmitted	\$.000932
(b) CD ROM - per CD ROM	\$ 60.00
(c) Cartridge Tape: - per tape - per record	\$ 51.84 .0018
(d) Internet Mailbox - per mailbox, per month	\$ 40.00

13.3.9 Telecommunications Service Priority (TSP) System

(A) Service Description

The Telecommunications Service Priority (TSP) System is a structured coding scheme that prescribes the order in which National Security Emergency Preparedness (NSEP) telecommunications services are installed or restored. The TSP System was developed to support the requirements of the U. S. Government as defined in the TSP Service Vendor Handbook and applies only to NSEP telecommunications services to which the Company is able to apply priority treatment. It requires and authorizes priority action by the Company.

Conditions of emergency or crises that cause invocation of NSEP treatment can only be declared by authorized officials of the Federal Government or other officials (Federal or Non-Federal) specified by the Manager - National Communication System (NCS) on behalf of the Executive Office of the President of the United States.

13 - Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.9 Telecommunications Service Priority (TSP) System (Cont'd)

(B) Limitations

- (1) Priority installation and/or restoration of NSEP telecommunications services shall be provided in accordance with Part 64.401, Appendix A, of the Federal Communications Commission's (FCC's) Rules and Regulations.

In addition, TSP System service shall be provided in accordance with the guidelines set forth in "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service User Manual" (NCS manual 3-1-1 dated July 9, 1990) and "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service Vendor Handbook" (NCS manual 3-1-2 dated July 9, 1990).

- (2) The customer for TSP System Service also must be the same customer for the underlying Access Service with which it is associated.
- (3) The Company will arrange for the installation and/or restoration of TSP System Service upon receipt of the proper certification as specified in FCC Rules and Regulations cited in paragraph (1) preceding.
- (4) It is the responsibility of the TSP user to provide the TSP Authority Code to the Company with each service request.
- (5) When performing Priority Installation or Priority Restoration (repair) on TSP-designated services in compliance with the Rules and Regulations cited in (1) above, the Company may not be in a position to notify the customer regarding additional labor charges if additional labor is required.

The customer recognizes that quoting charges and obtaining permission to proceed with the installation or restoration of service may cause unnecessary delays and grants the Telephone Company the right to quote charges after the installation or restoration has been completed.

13 - Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.9 Telecommunications Service Priority (TSP) System (Cont'd)

(C) Rules and Regulations

- (1) Under certain conditions it may be necessary to preempt one or more customer services with a lower (or no) restoration priority in order to install or restore NSEP telecommunications service(s). If preemption is necessary, and if circumstances permit, the Telephone Company will make every reasonable effort to notify the preempted customer of the action to be taken. Credit allowance for service preemption shall be made in accordance with the provisions set forth in 2.4.4(E) preceding concerning temporary surrender of a service.
- (2) No charge applies when a TSP designation is discontinued.
- (3) With the exception of credit information, a customer obtaining TSP system service acknowledges and consents to the provision of certain customer service details by the Telephone Company to the Federal Government to allow for the proper maintenance and administration of the TSP system. That information includes but is not necessarily limited to:
 - (a) Confirmation of completed TSP service orders directly to the Manager, National Communications System (NCS);
 - (b) Verification of installation and/or restoration priority level assignment(s) with the Manager, NCS;
 - (c) Reconciliation of TSP service information with the Manager, NCS, or the customer (prime service vendor).

(D) Definitions

National Communications System (NCS)

The NCS is established under the Executive Office of the President of the United States and is responsible for the day-to-day operation of the TSP System. This includes maintaining a twenty-four hour point-of-contact to handle emergency provisioning requests, assigning priority levels and Authorization Codes and maintaining data on TSP assignments.

ACCESS SERVICE

13 - Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.9 Telecommunications Service Priority (TSP) System (Cont'd)

(D) Definitions (Cont'd)

National Security Emergency Preparedness (NSEP) Services

NSEP services are telecommunications services that are used to maintain a state of readiness or to respond to and manage any event or crisis (local, national or international) which causes or could cause injury or harm to the population, damage to or loss of property, or degrades or threatens the NSEP posture of the United States.

Prime Vendor

The service vendor from whom the service user or its authorized agent orders service.

Priority Installation (PI)

Provisioning, on a priority basis, of a new TSP service authorized as so urgent that it must be provided earlier than the Company's standard provisioning interval.

Priority Restoration (PR)

Restoration, on a priority basis, of an existing TSP service for which any interruption would have serious adverse impact on the supported NSEP function.

Subcontractor

The service vendor from whom the prime vendor obtains service for the completion of the prime vendor's end-to-end service.

13.3 Miscellaneous Services (Cont'd)

13.3.9 Telecommunications Service Priority (TSP) System (Cont'd)

(D) Definitions (Cont'd)

Telecommunications Service Priority (TSP) System

TSP is a structured coding scheme that establishes the order in which NSEP services are to be installed or restored in the event of an emergency. The TSP system was developed to ensure priority treatment of the nation's most important telecommunications services.

TSP Authorization Code

A twelve character code that identifies an NSEP TSP service and denotes the order in which that service is to be provisioned (installed) and/or restored.

(E) TSP Rate Categories

There are two basic rate categories which apply to TSP System service:

- (1) Priority Installation (PI)
- (2) Priority Restoration (PR)
 - (a) Level Implementation
 - (b) Level Change
 - (c) Maintenance/Administration

Certain activities associated with TSP System service are included in the rate elements as follows:

- Priority Installation includes order coordination.
- Priority Restoration includes system development, verification and confirmation.

(T)

(A) Service Description

(1) General

BellSouth Administrative Management Service provides customers, through a single point, access to customer service information functions listed in Section 13.3.10.(A)(2) following. BellSouth Administrative Management Service is only available at suitably equipped Telephone Company offices where facilities are available. Although not all network management functions are available on a 24 hour basis, BellSouth Administrative Management Service will be provided on a 24 hour basis.

(T)

(T)

(T)

(2) Customer Service Information Functions

Customer Service Information Functions are comprised of two categories, features and options, as follows:

(a) Features

- Access Billing Information

This feature permits the customer to obtain information concerning the customer's last and current bill amounts and any payments or adjustments posted to date. Additionally, access to the Customer Service record which provides information such as customer name, listed address, yellow pages heading (if any), additional listings (if any), billing address, Interexchange Carrier identification, and service and equipment.

(B) Provision of Service

The customer may access BellSouth Administrative Management Service on either a dial/shared or dedicated basis.

For dial/shared access, the customer is required to provide a terminal and a modem. Provided the customer's premises resides in a Telephone Company locally franchised territory, the customer will dial a non-toll access number furnished by the Telephone Company which provides access to BellSouth Administrative Management Service. If the customer's premises is outside a Telephone Company LATA, the call may be either toll or non-toll, depending on the customer's premises location, to reach a BellSouth Administrative Management Service port. The BellSouth Administrative Management Service port will be assigned a seven digit number to enable the customer to access this port. If the customer desires multiple telephone numbers to access BellSouth Administrative Management Service, an additional port charge, as set forth in 13.3.10(E)(3) following, is required for each additional telephone number requested. (Only one telephone number is assigned per port).

Dedicated access to BellSouth Administrative Management Service will be provided over a dedicated 9600 bps data circuit obtained by the customer from the Telephone Company to a location designated by the Telephone Company. Dedicated access is used in conjunction with customer-provided terminal and modem.

13.3.10 BellSouth Administrative Management Service (Cont'd)

(C) Allowance for Interruptions

- (1) A BellSouth Administrative Management service interruption occurs when the customer's access to the customer service information functions is not available for the customer's use. The total service will be deemed as unavailable if either the dedicated access line used by the customer to access BellSouth Administrative Management service or the BellSouth Administrative Management service processor is not operational. A BellSouth Administrative Management service interruption is not considered to occur if only information associated with BellSouth Administrative Management service features is not available. A pro rata adjustment of the appropriate BellSouth Administrative Management service monthly charges will be allowed if the total service is unavailable for more than a twenty-four hour period. Appropriate BellSouth Administrative Management service monthly charges do not include the block of usage for transaction charges. There will be no pro rate adjustment for interruptions due to a particular customer service information function not being available.
- (2) No credit shall be allowed for an interruption of BellSouth Administrative Management service that is less than 24 hours. The customer shall be credited for an interruption of 24 hours or more at the rate of 1/30 of the monthly rates for each period of 24 hours or major fraction thereof that the interruption continues for failure to gain information, i.e., transactions, etc. via BellSouth. In the case of BellSouth Administrative Management services billed upon actual usage, no credit allowance is applicable.

(D) Application of Rates

For the initial establishment of BellSouth Administrative Management service, a nonrecurring Basic Service charge and a recurring monthly charge as set forth in 13.3.10(E)(1) will apply.

ACCESS SERVICE

13 - Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.11 Equal Access Transaction Services

(S)

(A) Service Description

Equal Access Transaction Services provide a non-mechanized interface with the Telephone Company for specified due dates for PIC changes, customer service record (CSR) information, Verification, verification of pending service orders that impact PIC orders, and resolution of PIC discrepancies.

The Telephone Company will provide Equal Access Transaction Services to interexchange carriers (ICs) participating in BellSouth Equal Access Subscription. The IC must execute and submit to the Telephone Company a blanket agency letter for submitting PIC orders.

(S)

Equal Access Transaction Services provided are described as follows:

(1) Specified Due Date for PIC Change Service

The Telephone Company will accept an order from an IC requesting the Telephone Company to change the PIC for an end user's business, residence or pay telephone access line to the IC's Carrier Identification Code (CIC). The Telephone Company will internally coordinate and schedule a standard due date which shall be provided to the IC requesting the change. The Telephone Company will accept such orders either by Working Telephone Number (WTN) or for all WTNs associated with a Billing Telephone Number (BTN).

(C)(x)

The Telephone Company will accept a request from an IC to process and coordinate internally a due date for a PIC change in an interval shorter than the standard service interval for a PIC change order. The customer and the Telephone Company shall work cooperatively in establishing expedited due dates. It shall be within the sole discretion of the Telephone Company to determine whether it can meet a requested expedited due date. If an expedited due date cannot be met within normal working hours, overtime charges, as stipulated in 13.2.6(C) preceding shall apply.

(S) Originally filed under TN377 scheduled to become effective December 16, 1996.

(x) Issued under the authority of F.C.C. Report and Order FCC 96-388 In The Matter of Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996. CC Docket No. 96-128, released September 20, 1996, as modified in the RECONSIDERATION ORDER, FCC 96-439, released November 8, 1996.

ACCESS SERVICE

13 - Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.11 Equal Access Transaction Services (Cont'd)

(A) Service Description (Cont'd)

(2) Customer Service Record (CSR) Information Service

The Telephone Company will provide and/or verify CSR information which the IC has obtained proper authorization to receive from the residence, business or pay telephone customer. A confirmation of choice as stipulated in 13.3.3(B) preceding from a customer will be provided by IC to the Telephone Company upon request. The confirmation of choice must, if for a business, specifically include all of the customer's subsidiaries and/or affiliated companies for which it is valid. (C)(x)

CSR Information Service provides the following information to the requesting IC:

- (a) Billing Name (BN)
- (b) Billing Address (BA)
- (c) Billing Telephone Number (BTN)
- (d) Working Telephone Number (WTN)
- (e) Terminal Numbers (TERs)
- (f) Customer Type (residence/business/pay telephone)
- (g) Customer Code

(C)(x)

Carrier Identification Code (CIC) information is not provided as a part of Customer Record Information Service. However, the requesting IC can verify if the IC's CIC is shown on the CSR by requesting CIC verification.

(3) CIC Verification

CIC verification is made available from the Telephone Company's Equal Access Service Center (EASC) only through written or facsimile (fax) requests submitted by the IC. Charges are applicable on a Billing Telephone Number (BTN) and Working Telephone Number (WTN) basis for each line verified.

(4) Verification of Pending Service Orders that Impact PIC Orders Service

The IC may request the status and/or verification of pending service orders that impact residence, business and/or pay telephone PIC orders. The IC must provide the service order numbers or the BTNs to the Telephone Company before verification can be provided. The Telephone Company shall provide an estimated due date to the IC for the pending service order(s). (C)(x)

(x) Issued under the authority of F.C.C. Report and Order FCC 96-388 In The Matter of Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996. CC Docket No. 96-128, released September 20, 1996, as modified in the RECONSIDERATION ORDER, FCC 96-439, released November 8, 1996.

13.3 Miscellaneous Services (Cont'd)

13.3.11 Equal Access Transaction Services (Cont'd)

(A) Service Description (Cont'd)

(5) Resolution of PIC Discrepancy Service

The IC may request resolution of residence, business and/or pay telephone PIC discrepancies. The charge for Resolution of PIC Discrepancy Service, as specified in (E) following is applicable per WTN verified. If the Telephone Company determines that there is a discrepancy in the switch (i.e., the customer's service record shows the customer subscribed to the inquiring IC and the line is programmed to a different IC), the line information will be corrected and the inquiring IC will not be charged for the request on that WTN.

(C)(x)

(B) Restrictions on Use of Information

ICs requesting Equal Access Transaction Services for non-published numbers must submit a statement to the Telephone Company stating that the IC will protect the privacy of subscribers within on-published telephone numbers.

In addition, the ICs must agree that the line information provided via Equal Access Transaction Services:

- (1) Shall not be resold or otherwise provided to any other person, corporation, partnership or entity of whatever kind for any purpose.
- (2) Shall be used only in furtherance of establishing and maintaining interexchange service for end users who have requested such service from the IC.
- (3) Shall not be used for marketing or any other purposes not specifically set forth in (A) preceding.

(x) Issued under the authority of F.C.C. Report and Order FCC 96-388 In The Matter of Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996. CC Docket No. 96-128, released September 20, 1996, as modified in the RECONSIDERATION ORDER, FCC 96-439, released November 8, 1996.

- (4) Shall be inspected or used only by the duly authorized employees of the IC.
- (5) Shall not be reproduced in any way, other than as required internally for the establishment and maintenance of end user interexchange service.

The ICs may subcontract to third parties functions which include use of line information provided via Equal Access Transaction Services. However, that subcontractor must agree, in writing, to the same restrictions and nondisclosure requirements, as outlined in (B) preceding, applicable to ICs.

(C) Ordering Conditions

- (1) The time required to provision the services (i.e., the interval between the request date and the provision or due date) is known as the service interval. Such intervals will be established in accordance with published service date interval guidelines which are available to customers upon request, whether the customer's service date is subject to standard or negotiated intervals.
- (2) The Telephone Company will notify the IC of the mutually agreed upon standard or expedited due date, not later than one business day following the issue date of the order. (C)

13.3.12 Security Card

(A) Description

Dial access and web access customers of Mechanized Interface to Specified Operation Support Systems and/or FlexServ Service (a.k.a. BellSouth SPA Customer Reconfiguration) must order a Security Card. A nonrecurring charge will apply. This card provides the customer a unique password identification code, which will electronically change periodically, thereby providing a valuable layer of security. Should the customer require additional cards for reasons such as additional users or lost or damaged card, a nonrecurring charge will apply for each additional card requested. (C)

If the customer has purchased a Security Card in conjunction with a feature or service offered by the Company, that Security Card may also be used in conjunction with other features or services requiring a Security Card. It is up to the customer to notify the Company of an existing Security Card so the Company can ensure that the card is validated for multiple features and/or services.

13.3.13 International Call Blocking

(A) Service Description

International Call Blocking is a discrete end user service that blocks only international direct-dialed sequences (011+ and 101XXXX+011+). This feature is provided from suitably equipped Telephone Company offices. It is provided where facilities permit as specified in the National Exchange Carrier Association Inc., Tariff F.C.C. No. 4. International Call Blocking will be available utilizing standard intervals, to Basic Exchange customers purchasing flat, measured or message rate PBX Trunks, Basic Exchange customers purchasing toll terminals and Basic Exchange Customers purchasing Public Telephone Access Service for Customer Provided Equipment. International Call Blocking Service of Direct Distance Dialed calls for non-standard toll terminal, PBX and Public Telephone Access Service for customer provided Optional Service Features arrangements, as well as other Basic Exchange services, will require a negotiated due date. These services and associated rates are located in each state's General Subscriber Services Tariff.

13.3.15 BellSouth Billing Name and Address for ANI

- (A) BellSouth Billing Name and Address for ANI service provides for end user or location provider or its authorized agent billing name and address and associated information. It is available to telecommunications services providers such as an Enhanced Service Provider (ESP), Operator Service Provider (OSP), Interexchange Carrier (IC) and any other provider of telecommunications services.
- (B) BellSouth Billing Name and Address for ANI service is available on those calls for which the Automatic Number Identification of the calling or billed party is provided to the Telephone Company. This includes 101XXXX dialed calls, calling card calls and collect and third party billed calls. Information provided consists of the following:
1. BellSouth Billing Name and Address for the subscriber
 2. Billing Telephone Number (BTN)
 3. Working Telephone Number (WTN)
 4. Terminal Number (TN)
 5. Customer Type Indicator (CTI)
 6. Customer Code
- (C) BellSouth Billing Name and Address for ANI service is ordered under terms and conditions as set forth in Section 5.2.14 preceding in order to establish an account.

For calling card calls and collect and third party billed calls, BellSouth Billing Name and Address for ANI service is not available on accounts of nonpublished/ unlisted end users who, by request to the Telephone Company (which request may be submitted at any time), have specified that such information not be released.

- (x) Issued under the authority of F.C.C. Second Report and Order in CC Docket No. 92-237, In the Matter of Administration of the North American Number Plan Carrier Identification Codes (CICs), released April 11, 1997, as modified, in the Reconsideration, Order on Application for Review, and Second Further Notice of Proposed Rulemaking, released October 22, 1997.

13.3.15 BellSouth Billing Name and Address for ANI (Cont'd)

- (D) The provider may deem it necessary to request the Telephone Company
resend the BellSouth Billing Name and Address for ANI information. Such
a request, when not the result of Telephone Company error, will be
subject to the same rates and charges as the original request. (T)
- (E) Restrictions on use of BellSouth Billing Name and Address for ANI
information: (T)
- the provider, or its authorized billing and collection agent,
agrees not to publish any BellSouth Billing Name and Address for
ANI information provided and to use such information for the sole
purpose of rendering bills for its provision of telecommunications
services to its customers; (T)
 - the provider, or its authorized billing and collection agent, shall
not permit anyone but its duly authorized employees to inspect or
use BellSouth Billing Name and Address for ANI information; (T)
 - the provider, or its authorized billing and collection agent, may
not use the BellSouth Billing Name and Address for ANI information
to publish and distribute, in any form, lists of the subscribers
provided; (T)
 - the provider, or its authorized billing and collection agent, shall
not reproduce in any way copies of the BellSouth Billing Name and
Address for ANI information furnished, other than as required
internally for the rendering of bills for telecommunications
services provided. (T)

(F) General

The Telephone Company will provide BellSouth Billing Name and Address
for ANI data no later than ten (10) business days from the date of
receipt of the customer's request. Availability of data may be delayed
if errors exist in the request received from the customer. (T)

13.3.17 900-Type Pay per Call Service Blocking

(A) Service Description

900-Type Pay Per Call Service Blocking is a discrete end user service that blocks only 900-type calls. This feature is provided from suitably equipped Telephone Company offices. It is provided where facilities permit as specified in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. Tariff FCC No. 4. 900-Type Pay Per Call Service Blocking will deny access to 900-type services originated from Basic Exchange customers using flat, measured or message rate PBX trunks, Centrex Type Services main station lines, flat, measured or message rate residence or business lines, and BellSouth SWA FGA lines. (T)

900-Type Pay Per Call Service Blocking is provided at no charge when ordered with new lines, PBX trunks, BellSouth SWA FGA lines or Centrex Type Services main station lines. It is also available at no charge, on a one-time basis, for sixty (60) days, after the installation of new lines, PBX trunks, BellSouth SWA FGA lines or Centrex Type Services main station lines. Charges, if applicable, will be applied per line/trunk equipped with 900-Type Pay Per Call Service Blocking. (T)

13.3.18 Answer Supervision

(A) Service Description

Answer Supervision provides the capability of delivering "off hook" supervisory signals from the subscriber's serving central office to a line interface at the customer's premises for calls processed and completed by the Telephone Company. These supervisory signals indicate when the called party has answered an incoming call (gone "off hook"). Answer Supervision is available for Pay Telephone lines. Answer Supervision is furnished only from central offices served by a DMS switch.

A nonrecurring charge is not applicable if Answer Supervision is requested when establishing a new Pay Telephone Line, only the monthly rate will be applicable. When requesting Answer Supervision be added to existing service the nonrecurring charge and the monthly rate will be applicable. This service is only available for the state of Florida.

13.3.19 Enhanced Originating Line Screening (EOLS) Service

(A) General Description

Enhanced Originating Line Screening (EOLS) Service provides information about calls originated from screened lines. The EOLS Service is transaction-oriented and consists of accepting Originating Line Number Screening (ONLS) queries sent from subscribing carriers, accessing the Calling Number information in the EOLS data base, and returning the Service or Equipment Indicator (SOE) stored in the data base.

(B) Obligations of the Telephone Company

(1) General

The Telephone Company will designate the EOLS Location(s) at which EOLS Service is provided in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. 4. The EOLS Location(s) is the Signal Transfer Point (STP) and its associated Point Code to which the EOLS query will be sent. The EOLS Location(s) will respond to queries received in the required signaling protocol for messages formatted in the American National Standards Institute specification of Signaling System No. 7 (ANSI SS7) protocol.

(2) Transport

Transmission facilities and transport terminations between the SPOI of the ordering customer and the EOLS Location (provided as described in Section 6.1.3, preceding) and between the EOLS Location and the Service Control Point (SCP) represent two-way, diversified digital transmission paths from the customer SPOI to the SCP, via a Telephone Company designated EOLS Location. This transmission path transports queries from the SPOI to the SCP and responses to the SPOI from the SCP in the SS7 protocol. The technical specifications for the interface required at the customer SPOI are provided in the BellSouth EOLS Technical Reference (TR-73604) document.

(3) EOLS Data Specifications

The Telephone Company's EOLS database will contain a record for every working line number identified by the Telephone Company as having a call screening code assignment.

The Telephone Company will update the EOLS information; e.g. add, delete, and modify customer accounts as customers move or order new service as appropriate.

13.3 Miscellaneous Services (Cont'd)

13.3.19 Enhanced Originating Line Screening (EOLS) Service(Cont'd)

(B) Obligations of the Telephone Company (Cont'd)

(4) EOLS System Management

The Telephone Company will administer its EOLS to insure the provision of acceptable service levels to all customers of the Telephone Company's EOLS Service. During periods of system congestion, call gapping procedures may be utilized to control such congestion.

(5) Confirmation Service

At the request of a customer, the Telephone Company Business Office will confirm which call screening codes are associated with the customer's lines.

(C) Obligations of the Customer

To obtain EOLS Service, the customer must order CCS7 Signaling Connections and Terminations as described in 6.1.3(C) preceding.

(N)
(N)

The customer and the Company shall cooperatively determine the number of additional transmission paths needed, if any, for EOLS Service.

The customer's facilities at the customer's SPOI shall provide the necessary capability to send queries and receive responses in the American National Standards Institute specifications of Signaling System No. 7 (ANSI SS7) protocol.

The customer will cooperatively test with the Telephone Company at the time of installation the parameters as specified in the BellSouth EOLS Technical Reference (TR-73604) document.

(D) Ordering Requirements and Payment Arrangements

(1) Minimum Periods

The minimum period for which services are provided is as set forth in Section 2.4.2 preceding.

(2) Moves

Moves will be treated as set forth in 6.7.7 preceding, and all associated nonrecurring charges will apply. Minimum period requirements will be established at the new location as set forth in 6.7.7 preceding. In addition, all outstanding minimum period charges for the discontinued service will apply.

13.3.21 BellSouth Wireless Local Number Portability End User Line Charge

(A) General

The BellSouth Wireless LNP End User Line Charge (End User Line Charge) recovers the incremental costs to implement Wireless Local Number Portability (WLNP). This charge will be applied to all lines which are portable between telecommunications service providers. An end user line is deemed to be portable at the time the NPA-NXX serving that line is capable of providing Local Number Portability. The offices deemed to be portable and for which the End User Line Charge will apply are set forth in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

The End User Line Charge will apply to:

- Primary Residential Local Exchange service lines or trunks
- Primary Business Local Exchange service lines or trunks
- Feature Group A (FGA) lines (Toll Guide accounts)
- Unbundled Network Element (UNE) switch ports
- PBX trunks
- Payphone Service Provider lines
- Foreign Exchange (FX) service lines
- Foreign Central Office (FCO) service lines
- Centrex Type Services station lines
- Basic Rate ISDN Digital Subscriber lines (ISDN BRI)
- Primary Rate ISDN Interface (ISDN PRI)

The applicable End User Line Charge will be billed to Resellers in the case of any end user lines sold to Resellers.

(B) Limitations

The End User Line Charge will not apply to Lifeline lines or local exchange service provided as remote call forwarding residential or business service.

(C) Payment Arrangements and Credit Allowances

- When there is an interruption to an end user's ported line, requested LNP End User Line charge credit allowances for interruptions will be provided as set forth for credit allowance for interruptions in 2.4.4 preceding.
- When an end user temporarily suspends its local exchange service which is associated with End User Line Charge, one-half of the End User Line Charge per month charge will be temporarily suspended for the time period the local exchange service is suspended.

ACCESS SERVICE

13 - Additional Engineering, Additional Labor and Miscellaneous Services
(Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.22 Intra-Office Collocation Cross Connect Service

(A) General Description

- (1) Intra-Office Collocation Cross Connect Service provides for a collocator to interconnect its network with that of another collocator at the Telephone Company's premises and to connect its collocated equipment to equipment of another collocated carrier within the same Telephone Company premises pursuant to 47 U.S.C. Section 201 of the Communications Act of 1934, as amended.

(B) Limitations

- (1) No representation is made as to the transmission capability of the fiber jumper other than it will consist of a single mode fiber capable of transmitting 1310 nm or 1550 nm wavelengths

(C) Obligations of the Telephone Company

- (1) Intra-Office Collocation Cross Connects will be provisioned between a collocator's virtual or physical collocation arrangement and those of another collocated telecommunications carrier within the same central office.
- (2) Intra-Office Collocation Cross Connect Service shall be provisioned through facilities owned by the two collocators that are interconnecting their networks or equipment and the Telephone Company's distribution frames or panels. The Telephone Company will provide a jumper between two CFAs provided by the two collocators.

(D) Obligations of the Ordering Collocator

- (1) The ordering collocator is responsible for all ordering, bill payment, disconnect orders and maintenance transactions and is the customer of record.
- (2) The ordering collocator must submit to the Telephone Company written certification that more than ten percent of the amount of traffic to be transmitted through the Intra-Office Collocation Cross Connect Service will be interstate.
- (3) The ordering collocator must submit to the Telephone Company a Letter of Authorization (LOA) from the other collocator that includes the appropriate CFA and Access Carrier Terminal Location (ACTL) that the Telephone Company is authorized to use for interconnecting the networks or equipment of the two collocators.

ACCESS SERVICE

13 - Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.23 Physical Access Cross Connect Service

(A) General Description

- (1) Physical Access Cross Connects provide a one to one dedicated transmission path between the ordering customer's tariffed service offerings or transport equipment located in the Telephone Company Central Office and the ordering customer's own physical collocation arrangement or another telecommunications carrier's (collocator's) physical collocation arrangement in the same Telephone Company Central Office.
- (2) Standards for performance monitoring of services which interconnect to the collocation arrangement will be driven by the particular service type and service specific requirements. The Telephone Company's obligation for monitoring ends at the demarcation point.
- (3) Physical Access Cross Connects are flat rate, non-distance sensitive charges and will be applied on a per cross connect ordered basis.
- (4) Physical Access Cross Connects will be ordered on the same ASR as the service being cross-connected. All ASRs must be complete and accurate before the Company will initiate the provisioning process.
- (5) Nonrecurring charges are applicable for Physical Access Service Cross Connect Service.
- (6) The collocator may cross connect at the DSO level with the following Telephone Company access services:
 - Local and Interoffice Channels (described in 7.1.2 of this Tariff)
 - Optional Features and Functions (described in 7.1.2(C) of this Tariff)
 - Exchange Access Frame Relay Service (described in 21.1 of this Tariff)
 - Managed Shared Frame Relay Service (described in 21.4 of this Tariff)

**BELLSOUTH TELECOMMUNICATIONS, INC.'S OBJECTIONS AND RESPONSES
TO THE JOINT PETITIONERS' FIRST SET OF INTERROGATORIES**

BellSouth Telecommunications, Inc. ("BellSouth") hereby files the following Objections and Responses to NewSouth Communications Corp, NuVox Communications, Inc., KMC Telecom V, Inc., KMC Telecom III LLC, and Xspedius Communications, LLC's ("Joint Petitioners") First Set of Interrogatories, dated April 6, 2004.

GENERAL OBJECTIONS

1. BellSouth objects to the interrogatories to the extent they seek to impose an obligation on BellSouth to respond on behalf of subsidiaries, affiliates, or other persons that are not parties to this case on the grounds that such interrogatories are overly broad, unduly

burdensome, oppressive, and not permitted by applicable discovery rules. Specifically, the Joint Petitioners define BellSouth to include, in relevant part, "all divisions, subsidiaries, parent(s), and affiliates" BellSouth will not be responding to discovery that seeks information from parent and affiliate companies.

2. BellSouth objects to the interrogatories to the extent they are intended to apply to matters other than those subject to the jurisdiction of the Commission. BellSouth objects to such interrogatories as being irrelevant, overly broad, unduly burdensome, and oppressive.

3. BellSouth objects to each and every interrogatory and instruction to the extent that such request or instruction calls for information that is exempt from discovery by virtue of the attorney-client privilege, work product privilege, or other applicable privilege.

4. BellSouth objects to each and every interrogatory insofar as the interrogatories are vague, ambiguous, overly broad, imprecise, or utilize terms that are subject to multiple interpretations but are not properly defined or explained for purposes of these interrogatories. Any answers provided by BellSouth in response to the interrogatories will be provided subject to, and without waiver of, the foregoing objection.

5. BellSouth objects to each and every interrogatory insofar as it is not reasonably calculated to lead to the discovery of admissible evidence and is not relevant to the subject matter of this action. BellSouth will attempt to note in its responses each instance where this objection applies.

6. BellSouth objects to providing information to the extent that such information is already a matter of public record before this or another state commission or federal regulatory agency; or is otherwise available as a matter of public record; e.g., is available on a publicly accessible website.

7. BellSouth objects to the Joint Petitioners' discovery requests, instructions and definitions, insofar as they seek to impose obligations on BellSouth that exceed the requirements of the Alabama Rules of Civil Procedure or Alabama Law. BellSouth will provide information responsive to the Joint Petitioners' discovery in the manner specified by this Commission.

8. BellSouth objects to each and every interrogatory, insofar as any of them are unduly burdensome, expensive, oppressive, or excessively time consuming as written.

9. BellSouth is a large corporation with employees located in many different locations in Alabama and in other states. In the course of its business, BellSouth creates countless documents that are not subject to Commission or FCC retention of records requirements. These documents are kept in numerous locations that are frequently moved from site to site as employees change jobs or as the business is reorganized. Therefore, it is possible that not every document has been identified in response to these requests. BellSouth will conduct a search of those files that are reasonably expected to contain the requested information. To the extent that the requests purport to require more, BellSouth objects on the grounds that compliance would impose an undue burden or expense.

10. BellSouth objects to each and every interrogatory to the extent that the information requested constitutes "trade secrets". To the extent that the Joint Petitioners request proprietary confidential business information, BellSouth will make such information available in accordance with a protective agreement, subject to any other general or specific objections contained herein.

11. BellSouth also objects to any interrogatory to the extent that it seeks confidential information that BellSouth cannot disclose under the FCC's Customer Proprietary Network Information ("CPNI") rules, 47 CFR §64.2007 or under protective agreements with CLECs to

which BellSouth is a party. BellSouth will only provide CPNI and CLEC confidential information consistent with the FCC's rules and BellSouth-executed protective agreements.

12. BellSouth objects to any discovery request that seeks to obtain "all" of particular documents, items, or information to the extent that such requests are overly broad and unduly burdensome. Any answers provided by BellSouth in response to this discovery will be provided subject to, and without waiver of, the foregoing objection.

13. BellSouth also objects to Joint Petitioners' request for information from February 8, 1996 to the present as being irrelevant and not likely to lead to the discovery of admissible evidence as well as overly broad and burdensome.

Respectfully submitted this 17th day of May, 2004.

ATTORNEYS FOR BELL SOUTH
TELECOMMUNICATIONS, INC.

ISSUE: How should "End User" be defined?

REQUEST: Identify all documents, including but not limited to ICA's, agreements that are not ICA's, memoranda, legal pleadings, tariffs, policy statements, policy manuals, and training materials, in which BellSouth defines, discusses or agrees to the definition of the term "End User." If an identified document is an ICA or an agreement that is not an ICA, please provide: (a) the name of the other party to the agreement; (b) the effective date of the interconnection agreement; (c) the termination date of the agreement; (d) the paragraph or section number of the agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. G-2-1 on the grounds that it is overly broad and unduly burdensome. BellSouth has thousands of ICAs, legal pleadings, tariffs, and other documents that BellSouth would need to locate, search, and review in order to respond to this interrogatory. BellSouth further objects to this interrogatory on the grounds it potentially seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website. Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Moreover, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs and documents involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to this objection and without waiving this objection, see BellSouth's response to the Joint Petitioners' First Request for Production of Documents, Item No. G-2-1.

ISSUE: Should the agreement contain a general provision providing that BellSouth shall take financial responsibility for its own actions in causing, or contributing to unbillable or uncollectible revenue in addition to specific provisions set forth in Attachments 3 and 7?

REQUEST: Identify all documents, including but not limited to ICAs, agreements that are not ICAs, memoranda, legal pleadings, policy statements, tariffs, policy manuals, and training materials, in which BellSouth discusses, explains, adopts or refers to a policy regarding its taking financial responsibility for its own actions causing, or contributing to, unbillable or uncollectible revenue. If an identified document is an ICA or an agreement that is not an ICA, please provide: (a) the name of the other party to the agreement; (b) the effective date of the agreement; (c) the termination date of the agreement; (d) the paragraph or section number of the agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. G-3-1 on the grounds that it is overly broad and unduly burdensome. BellSouth has thousands of ICAs, legal pleadings, tariffs, and other documents that BellSouth would need to locate, search, and review in order to respond to this interrogatory. BellSouth further objects to this interrogatory on the grounds it potentially seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website (<http://www.bellsouth.com/tariffs/>). Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Moreover, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs and documents involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to and without waiving the foregoing objections, BellSouth, upon information and belief, has no responsive documents.

ISSUE: Should the agreement contain a general provision providing that BellSouth shall take financial responsibility for its own actions in causing, or contributing to unbillable or uncollectible revenue in addition to specific provisions set forth in Attachments 3 and 7?

REQUEST: Please state all circumstances of which you are aware in which BellSouth incurred unbillable or uncollectible revenue under an ICA that were not addressed by provisions similar to those proposed in Attachments 3 and 7 of the Agreement.

RESPONSE: BellSouth is not aware of any circumstances in which BellSouth incurred or caused unbillable or uncollectible revenue under an ICA that were not addressed by provisions similar to those proposed in Attachments 3 and 7 of the Agreement.

ISSUE: What should be the limitation on each Party's liability in circumstances other than gross negligence or willful misconduct?

REQUEST: Identify all documents, including but not limited to memoranda, legal pleadings, policy statements, tariffs, policy manuals and training materials, and agreements that are not ICAs in which BellSouth discusses, explains, adopts or refers to a policy regarding limitations of liability in circumstances other than gross negligence or willful misconduct. If an identified document is an agreement that is not an ICA, please provide: (a) the name of the other party to the agreement; (b) the effective date of the agreement; (c) the termination date of the agreement; (d) the paragraph or section number of the agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. G-4-1 on the grounds it is overly broad and unduly burdensome. BellSouth has thousands of "ICAs", legal pleadings, tariffs, and other documents that BellSouth would need to locate, search, and review in order to respond to this interrogatory. BellSouth further objects to this interrogatory on the grounds it potentially seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website. Particularly, in light of the voluminous nature of the Joint Petitioners' interrogatory, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Finally, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs and documents involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to this objection and without waiving this objection, see BellSouth's response to the Joint Petitioners' First Request for Production of Documents, Item No. G-4-1.

ISSUE: What should be the limitation on each Party's liability in circumstances other than gross negligence or willful misconduct?

REQUEST: Please state whether any BellSouth ICA includes limitation of liability terms that differ from these proposed by BellSouth in Section 10.4.1 of the General Terms and Conditions of the Agreement. For all such ICAs, please provide: (a) the name of the CLEC party to the interconnection agreement; (b) the effective date of the interconnection agreement; (c) the termination date of the interconnection agreement; (d) the paragraph or section number of the interconnection agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. G-4-2 on the grounds that it is overly broad and unduly burdensome. BellSouth has thousands of ICAs, legal pleadings, tariffs, and other documents that BellSouth would need to locate, search, and review in order to respond to this interrogatory. BellSouth further objects to this interrogatory on the grounds it potentially seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website. Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Moreover, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs and documents involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to and without waiving the foregoing objections, see BellSouth's response to the Joint Petitioners' First Request for Production of Documents, Item No. G-4-2.

ISSUE: Should each Party be required to include specific liability-eliminating terms in all of its tariffs and End User contracts (past, present and future), and, to the extent that a Party does not or is unable to do so, should it be obligated to indemnify the other Party for liabilities not eliminated?

REQUEST: Identify all documents, including but not limited to memoranda, legal pleadings, policy statements, tariffs, policy manuals, training materials, and agreements that are not interconnection agreements in which BellSouth discusses, explains, adopts or refers to a policy regarding a CLEC's failure to include specific liability-eliminating terms in its tariffs and/or End User contracts. If an identified document is an agreement, please provide: (a) the name of the other party to the agreement; (b) the effective date of the agreement; (c) the termination date of the agreement; (d) the paragraph or section number of the agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. G-5-1 on the grounds it is overly broad and unduly burdensome. The Joint Petitioners' request to provide information related to any BellSouth ICA is overly burdensome as it would require BellSouth to review hundreds of ICAs consisting of over 500 pages each to find the particular language that Joint Petitioners request, assuming it even exists. BellSouth further objects to this interrogatory on the grounds it seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website. Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Finally, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to and without waiving the foregoing objections, please see BellSouth's Response to Joint Petitioner's 1st Request for Production of Documents, Item No. G-5-1.

ISSUE: Should each Party be required to include specific liability-eliminating terms in all of its tariffs and End User contracts (past, present and future), and, to the extent that a Party does not or is unable to do so, should it be obligated to indemnify the other Party for liabilities not eliminated?

REQUEST: Please state whether any BellSouth ICA does not require the contracting CLEC to include liability-limiting terms in its tariffs and End User contracts and does not that CLEC to indemnify BellSouth for End User claims. For all such ICAs, please provide: (a) the name of the CLEC party to the interconnection agreement; (b) the effective date of the interconnection agreement; (c) the termination date of the interconnection agreement; (d) the paragraph or section number of the interconnection agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. G-5-2 on the grounds it is overly broad and unduly burdensome. The Joint Petitioners' request to provide information related to any BellSouth ICA is overly burdensome as it would require BellSouth to review hundreds of ICAs consisting of over 500 pages each to find the particular language that Joint Petitioners request, assuming it even exists. BellSouth further objects to this interrogatory on the grounds it seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website. Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Finally, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to and without waiving the foregoing objections, please see BellSouth's Response to Joint Petitioner's 1st Request for Production of Documents, Item No. G-5-2.

ISSUE: What should the indemnification obligations of the parties be under this Agreement?

REQUEST: Identify all documents, including but not limited to memoranda, legal pleadings, policy statements, tariffs, policy manuals, training materials, and agreements that are not interconnection agreements in which BellSouth discusses, explains, adopts or refers to a policy regarding BellSouth indemnification obligations under an Interconnection Agreement.

RESPONSE: BellSouth objects to Interrogatory No. G-7-1 on the grounds that it is overly broad and unduly burdensome. BellSouth has thousands of ICAs, legal pleadings, tariffs, and other documents that BellSouth would need to locate, search, and review in order to respond to this request. BellSouth further objects to this interrogatory on the grounds it potentially seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website. Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Moreover, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs and documents involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to and without waiving the foregoing objections, please see BellSouth's Response to Joint Petitioner's 1st Request for Production of Documents, Item No. G-7-1.

ISSUE: What should the indemnification obligations of the parties be under this Agreement?

REQUEST: Please state whether any BellSouth ICA contains indemnification provisions other than those proposed by BellSouth in Section 10.5 of the General Terms and Conditions of the Agreement. For all such ICAs, please provide: (a) the name of the CLEC party to the interconnection agreement; (b) the effective date of the interconnection agreement; (c) the termination date of the interconnection agreement; (d) the paragraph or section number of the interconnection agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. G-7-2 as overly broad and unduly burdensome. The Joint Petitioners' request to provide information related to any BellSouth ICA is overly burdensome as it would require BellSouth to review hundreds of ICAs consisting of over 500 pages each to find the particular language that Joint Petitioners request, assuming it even exists. BellSouth further objects to this interrogatory on the grounds it seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website. Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Finally, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to and without waiving the foregoing objections, please see BellSouth's response to Joint Petitioner's 1st Request for Production of Documents, Item G-7-2.

ISSUE: What language should be included in the Agreement regarding a Party's use of the other Party's name, service marks, logo and trademarks?

REQUEST: Identify all documents, including but not limited to memoranda, legal pleadings, policy statements, tariffs, policy manuals, training materials, and agreements that are not ICAs in which BellSouth discusses, explains, adopts or refers to a policy regarding BellSouth's use of a CLEC's name, service mark, logo and/or trademarks. If an identified document is an agreement, please provide: (a) the name of the other party to the agreement; (b) the effective date of the agreement; (c) the termination date of the agreement; (d) the paragraph or section number of the agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. G-8-1 on the grounds that it is overly broad and unduly burdensome. BellSouth has thousands of ICAs, legal pleadings, tariffs, and other documents that BellSouth would need to locate, search, and review in order to respond to this interrogatory. BellSouth further objects to this interrogatory on the grounds it potentially seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website (http://cpr.bellsouth.com/clec/docs/all_states/index7.htm). Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Moreover, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs and documents involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to this objection and without waiving this objection, see BellSouth's response to the Joint Petitioners' First Requests for Production of Documents, Item No. G-8-1.

ISSUE: What language should be included in the Agreement regarding a Party's use of the other Party's name, service marks, logo and trademarks?

REQUEST: Please state whether any BellSouth ICA contains language restricting BellSouth's use of the contracting CLEC's name, service mark, logo and/or trademarks. For all such ICA's, please provide: (a) the name of the CLEC party to the interconnection agreement; (b) the effective date of the interconnection agreement; (c) the termination date of the interconnection agreement; (d) the paragraph or section number of the interconnection agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. G-8-2 on the grounds that it is overly broad and unduly burdensome. BellSouth has thousands of ICAs, legal pleadings, tariffs, and other documents that BellSouth would need to locate, search, and review in order to respond to this interrogatory. BellSouth further objects to this interrogatory on the grounds it potentially seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website. Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Moreover, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs and documents involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to and without waiving the foregoing objections, see BellSouth's response to the Joint Petitioners' First Requests for Production of Documents, Item No. G-8-2.

ISSUE: Should a court of law be included among the venues at which a Party may seek dispute resolution under the Agreement?

REQUEST: Identify all documents, including but not limited to ICAs, agreements that are not ICAs, memoranda, legal pleadings, tariffs, policy statements, policy manuals and training materials, in which BellSouth discusses, explains, adopts or refers to a policy regarding the ability of a party to an agreement or ICA to take a dispute regarding that agreement or ICA to a court of law. If an identified document is an ICA or an agreement that is not an ICA, please provide: (a) the name of the other party to the agreement; (b) the effective date of the agreement; (c) the termination date of the agreement; (d) the paragraph or section number of the agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. G-9-1 on the grounds that it is overly broad and unduly burdensome. BellSouth has thousands of ICAs, legal pleadings, tariffs, and other documents that BellSouth would need to locate, search, and review in order to respond to this interrogatory. BellSouth further objects to this interrogatory on the grounds it potentially seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website. Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Moreover, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs and documents involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to and without waiving the foregoing objections, see BellSouth's response to the Joint Petitioners' First Requests for Production of Documents, Item No. G-9-1.

ISSUE: Should a court of law be included among the venues at which a Party may seek dispute resolution under the Agreement?

REQUEST: Please identify (by caption, forum, case number and filing date) and describe (including the nature of the claims, procedural status, and any resolution reached) any and all complaints filed in a court of law regarding the terms, performance or enforcement of an ICA between BellSouth and a CLEC.

RESPONSE: BellSouth objects on Interrogatory No. G-9-2 on the grounds that it is overly broad and unduly burdensome. BellSouth has thousands of documents it would need to locate, search, and review in order to respond to this interrogatory. BellSouth further objects to this interrogatory on the grounds it potentially seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website. Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Finally, BellSouth objects on the grounds that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. Complaints brought under the provisions of different ICAs involving different carriers and facts are not relevant to the specific arbitration herein.

ISSUE: Should the Agreement explicitly state that all existing state and federal laws, regulations, and decisions apply unless otherwise specifically agreed to by the Parties?

REQUEST: Identify all documents, including but not limited to ICAs, agreements that are not ICAs, memoranda, legal pleadings, tariffs, policy statements, policy manuals and training materials, in which BellSouth discusses, explains, adopts or refers to a policy regarding the application of state and federal laws, rules, regulations and decisions in relation to the obligations set forth in an ICA. If an identified document is an ICA or an agreement that is not an ICA, please provide: (a) the name of the other party to the agreement; (b) the effective date of the agreement; (c) the termination date of the agreement; (d) the paragraph or section number of the agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. G-9-1 on the grounds that it is overly broad and unduly burdensome. BellSouth has thousands of ICAs, legal pleadings, tariffs, and other documents that BellSouth would need to locate, search, and review in order to respond to this request. BellSouth further objects to this request on the grounds it potentially seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website (<http://www.bellsouth.com/tariffs/>). Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Moreover, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs and documents involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein.

Subject to and without waiving the foregoing objections, BellSouth is not aware of documents that set forth a policy regarding the application of state and federal laws, rules, regulations, and decisions in relation to the obligations set forth in an ICA. Also see BellSouth's response to the Joint Petitioners' First Requests for Production of Documents, Item No. G-12-1.

ISSUE: In the event of such conversion (from a UNE or Combination to Other Services or tariffed BellSouth access service), what rates should apply?

REQUEST: Identify all documents, including but not limited to memoranda, legal pleadings, policy statements, policy manuals, tariffs, training materials, and agreements that are not ICAs in which BellSouth discusses, explains, adopts or refers to a policy regarding the rates that apply when a CLEC submits a request to convert a UNE or Combination (or part thereof) to other services or tariffed BellSouth access services. If an identified document is an ICA or an agreement that is not an ICA, please provide: (a) the name of the other party to the agreement; (b) the effective date of the agreement; (c) the termination date of the agreement; (d) the paragraph or section number of the agreement which contains the relevant provisions.

RESPONSE: BellSouth objects to Interrogatory No. 2-4(B)-1 on the grounds that it is overly broad and unduly burdensome. BellSouth has thousands of ICAs, legal pleadings, tariffs, and other documents that BellSouth would need to locate, search, and review in order to respond to this request. BellSouth further objects to this request on the grounds it potentially seeks information that is already a matter of public record before this or another state commission or is readily accessible to the Joint Petitioners through publicly available means; e.g., publicly accessible website (http://cpr.bellsouth.com/clec/docs/all_states/index7.htm). Particularly, in light of the voluminous nature of the Joint Petitioners' request, the Joint Petitioners are not entitled to require other parties to gather information that is equally available and accessible to the Joint Petitioners. Moreover, BellSouth objects on the ground that the information requested is irrelevant and not likely to lead to the discovery of admissible evidence. The language contained in other ICAs and documents involving different carriers and facts and which resulted either from negotiation or arbitration is not relevant to the specific arbitration herein. Finally, BellSouth objects on the grounds that it is vague because specific access services are not defined and because TELRIC methodology is only applicable for UNE costing and not to cost services.

Subject to and without waiving the foregoing objections, BellSouth does not have a cost study for the specific activities requested. Disconnect cost associated with UNEs or Combinations are provided in BellSouth's TELRIC study filed in APSC

RESPONSE (CONT.):

Docket No. 27821 (see March 20 & November 15, 2001 versions) which is proprietary. Activities and procedures performed for each individual cost element are included in the cost study documentation.

ISSUE: In the event of such conversion (from a UNE or Combination to Other Services or tariffed BellSouth access service), what rates should apply?

REQUEST: Please identify the specific methods, procedures, and functions performed, and state the amount and type of the costs that BellSouth incurs from each such method, procedure and function, in converting UNEs or Combinations (or parts thereof) to a tariffed BellSouth access services. Include a BellSouth cost study and cost study information compiled in accordance with FCC TELRIC rules.

RESPONSE: BellSouth objects to Interrogatory No. 2-4(B)-2 in that the request is vague and imprecise in that specific access services are not identified. BellSouth also objects because providing a response requires the disclosure of confidential, proprietary cost information and to the extent the interrogatories imposes an obligation on BellSouth that doesn't exist under the law.

Subject to and without waiving the foregoing objections, BellSouth has no responsive documents. Also see BellSouth's response to the Joint Petitioners' First Set of Interrogatories, Item No. 2-4(B)-1.
